MICHI & JONNY FISCHER SOUTH AFRICA CHARITY

After a successful launch in December 2021, we have already raised CHF 5'000 in donations and transferred to the Ubungani relief organization. A big South Africa fan and supporter of this charity project is the comedian Jonny Fischer from the comedy duo Divertimento. We would like to say thank you for the cooperation! The two good ous are personally committed for the children and orphanage Baphumelele Relief Organization in Khayelitsha near Cape Town and thus make the lives of many children in South Africa more easy and help them to get a good start into a better future.

Per sold bottle we from KapWeine transfer CHF 6.00* to the UBUNGANI relief organization.

FACT #7 WHICH WINE HAS THE BETTER CO2 BALANCE - EUROPE OR SOUTH AFRICA?

Anyone who is an occasional wine drinker knows a great number of European wines. No wonder, just around the corner and «local consumption» or even, «no food waste» are the new trends in society. Because everyone wants to do something good for the planet and become as green as possible. But unfortunately the omnipresent reputation of European wines, if you look at the wine lists of Swiss restaurants, doesn't really help either. Because the CO2 emissions for transporting these wines, from the producing country to Switzerland is in some cases much higher than from South Africa.

We at KapWeine have done some research and put the facts on the table!
