## FOOD & WINE PAIRING

### Which wine goes with my food?

The basic idea of food and wine pairing can be visualized explain with interpersonal relationships. It's about, to create an embrace between wine and food in which some slight tensions are allowed to keep it interesting.

In combination, wine and food should complement each other. Ideally the flavors should even enrich each other. We know, that certain flavors go particularly well together and are perceived as taste-matching, while others are known to cause negative effect.

Classic examples:

- Sweetness in wine enhances the flavours of the food and softens acidity and spiciness.
- Tannins in wine reduce the sweetness of dishes.
- Wine and food should be similarly intense.
- Wine with a high alcohol content can make the fat of the food easier to digest.
- Roast flavours in food harmonise with sweetness and moderate acidity in wine.

In our article, we will look at 5 very popular grape varieties and their characteristics a little closer.

## AFRICAN MAG IS PURE AFRICA

When the wanderlust kicks in: The magazine «AFRICAN - The Fine Art of Travel» takes you on a journey through the beauty of the magical continent.

Tingly like a sparkling wine. Light and playful like a white wine. At the same time intense, animalistic and captivating like a red wine: Africa is all that. A continent full of emotions, longings, impressive landscapes and picturesque lodges. A smell. A taste. A glass of wine - and above all, unforgettable encounters with people and wild animals. With its 54 countries, this continent offers a diversity that is unique and inspiring. And anyone who has once flown so high, would like to experience this feeling over and over again. That is why AFRICAN - The Fine Art of Travel is a magazine that is written by Africa lovers for Africa lovers (and for all those who want to become one). Boundless and open as the vastness of this beautiful and diverse continent, AFRICAN captures all its facets twice a year: From Southern Africa to countries like Tanzania, Kenya and Rwanda - but also to island states like the Seychelles, Madagascar and Mauritius. We look into cooking pots as well as into the seemingly untouched wilderness. We meet chefs, winemakers, safari experts, entrepreneurs experts, artists, designers, producers, celebrities and insiders, People, in fact, who have stories to tell - and who make Africa what it is: Not only a love at first sight, but also a love that fills an entire magazine. To dream away. To plan a journey. And collect.
